

## ***Notus Makes Agreement with O. M. Rønning AS for Distribution in Norway***

Notus Electronics Ltd of Canada has made an agreement with O. M. Rønning AS to distribute the Notus product line in Norway. After visiting Notus at Fishing 2008 in Scotland and seeing the tremendous success that Notus has had in the UK, O. M. Rønning AS decided to take the Notus products onboard.

O. M. Rønning AS is located in Hammerfest, Norway and focuses on commercial marine electronics. One of the keys to Notus's success has been ensuring distributors have the technical capability to service and install its net monitoring systems. O. M. Rønning AS certainly has these capabilities due to their wealth of knowledge in the supply and service of marine electronics to the commercial fishing industry.

Both the Notus Seinemaster and Trawlmaster will be distributed. The Seinemaster is a net monitoring system for purse seiners that provides distance, depth and temperature information from one sensor. The Trawlmaster is a complete net monitoring system for single, twin and other multi-rig trawls.

O. M. Rønning AS has already taken orders for Notus in Norway with the first installation underway. For more information, please contact Notus Electronics Ltd; +1 709 753 0652; [saleinfo@notus.nf.ca](mailto:saleinfo@notus.nf.ca); [www.notus.nf.ca](http://www.notus.nf.ca). Contact O. M. Rønning AS at Tel: +47 78 41 17 85; [omr@omronning.no](mailto:omr@omronning.no).
